To Whom It May Concern,

Re: Consultancy Work Performed By Brenda Kelly – IQ Container Homes Ltd

Janette and I own a small 72 square metre log cabin home in Waihi which we moved into a year ago. Our family has moved out although we have amassed decades of memories and furniture. We have subscribed to the Tiny Homes Chanel on YouTube to get ideas on how we can create space. It is here that we saw Brenda's two episodes on her container homes. We were immediately impressed with Brenda's ideas. We noticed that we have twice the area available but we don't appear to have the same amount of space that Brenda managed to create in her homes.

We contacted Brenda to see if there was any chance of meeting her to run through some of her ideas and experiences. Brenda visited us in Waihi and spent some time walking through what was important to us and what we wanted to achieve. This meeting with Brenda alone was inspirational and rewarding. Amazingly, a couple of days later Brenda emailed a detailed 13 page presentation to us which was personalised to our home and based on what was important to us. Brenda's presentation included a floorplan of our home and section layout. Also each room has a "before" and "after" plan with furniture and fittings and internal wall movement to help create a flow to make better use of our spaces. Plus, Brenda included decks, steps and paths to create more indoor/outdoor flow. Not only has Brenda made these suggestions but she provided links to websites for the businesses and trades who can supply these products and services.

In short Brenda has provided us with so much useful information and ideas which we plan to use most, if not all towards making our home more spacious. Her ideas are totally in line with our meeting, showing that Brenda really was in tune with our needs from the onset.

Janette and I have no hesitation at all in recommending Brenda's consultancy services to other people with small homes wanting to make better use of what they have. Well done Brenda; you have inspired us to prune back and our family is in full support.

Yours sincerely,

Rob and Janette Copestake
